EXPLOREWMS

OSA WMS

EXTENDED PROFILE

OVERVIEW

Osa WMS is a cloud-native warehouse management solution from Osa Commerce, designed for third-party logistics (3PL) providers, fourth-party logistics (4PL) networks, multi-client warehouse operations, ecommerce fulfillment operations, and omnichannel businesses.

Built within the Osa Unified Commerce Platform, Osa WMS connects receiving, putaway, picking, packing, and shipping with inventory visibility and fulfillment across multiple locations and sales channels.

Key capabilities include real-time multi-warehouse inventory visibility, automated warehouse workflows, wave and batch picking, returns management, client portals, and automated 3PL billing.

Through Osa Zero Integration Management, businesses can connect their WMS with ERP systems, ecommerce platforms, marketplaces, carriers, and other supply chain technologies using configurable integration management, reusable business rules, and 440+ pre-built integrations.

Osa WMS is available independently or together with Osa’s native order management system (OMS). Configurable workflows and operational analytics help logistics providers reduce manual processes, improve fulfillment accuracy, accelerate client onboarding, and scale operations without relying on disconnected systems.

ABOUT THE VENDOR

Osa Commerce provides a cloud-native Unified Commerce Platform that connects warehouse management, order management, inventory visibility, and supply chain integrations through a shared orchestration layer.

Designed for 3PL providers, 4PL networks, retailers, brands, and omnichannel businesses, Osa helps organizations simplify complex fulfillment operations, improve operational efficiency, and scale through connected data, automation, and real-time visibility.

The platform combines WMS, OMS, and Osa Zero Integration Management to connect existing systems, apply configurable business rules, and coordinate fulfillment workflows across supply chain networks.
