

MANHATTAN ACTIVE WAREHOUSE MANAGEMENT (WM) EXTENDED PROFILE

OVERVIEW

Manhattan Active Warehouse Management (MAWM) is a cloud-native warehouse management system developed by Manhattan Associates.

Designed to optimize supply chain execution, MAWM provides real-time visibility, advanced automation, and workforce management capabilities within a unified platform.

The system is built to handle modern distribution challenges, including omnichannel fulfillment, labor management, and warehouse automation integration.

WHO IT'S FOR

MAWM is suited for businesses that require high-performance warehouse management, including retailers, wholesalers, and third-party logistics providers. Its scalability makes it ideal for organizations managing complex supply chains and large-scale distribution networks

KEY FEATURES

- **Cloud-native architecture:** Manhattan Active Warehouse Management is a fully cloud-based solution that eliminates the need for upgrades, ensuring continuous access to new features and enhancements.
- **Unified warehouse and labor management:** The platform combines warehouse execution and labor management in a single application, streamlining operations and improving workforce efficiency.
- **Advanced automation support:** MAWM integrates with various warehouse automation systems, including robotics, conveyors, and sortation equipment, through its built-in Warehouse Execution System (WES).
- **Order streaming technology:** Unlike traditional batch processing, MAWM dynamically prioritizes and sequences orders in real-time, reducing cycle times and increasing order fulfillment efficiency.
- **Intelligent slotting and inventory optimization:** The system continuously analyzes inventory placement, adjusting for demand fluctuations, product characteristics, and order patterns to maximize space utilization and picking efficiency.
- **User-friendly interface:** Designed for ease of use, MAWM features an intuitive interface with mobile-friendly workflows that simplify training and improve adoption.
- **Unified control and visibility:** The software provides real-time insights into warehouse operations, offering performance dashboards, task monitoring, and predictive analytics to improve decision-making.
