

# TECSYS ELITE WMS EXTENDED PROFILE

## OVERVIEW

Tecsys Elite WMS is a warehouse management system developed by Tecsys, a supply chain software provider with over 35 years of experience. The platform is built to support distribution operations across industries, including healthcare, retail, and complex supply networks.

The solution is designed to help organizations manage inventory, streamline warehouse workflows, and adapt to changing supply chain needs. It provides tools to manage receiving, putaway, picking, packing, and shipping, as well as inventory control and labor tracking.

The system supports multi-site operations and offers features for both high-volume and highly regulated environments. It's available as a cloud-based or on-premise solution, providing flexibility based on user preference and infrastructure.

## DEPLOYMENT & PLATFORM

Tecsys delivers Elite WMS as a SaaS solution on a leading cloud infrastructure, offering a 99.5% uptime commitment without on-premises hardware investment. The platform's modular design lets organizations start with core WMS functions and add analytics, billing, or extended ERP modules as requirements evolve.

## KEY FEATURES

- **Task management & picking:** System-directed RF workflows support multiple pick strategies (wave, waveless, zone, batch, cluster), plus one-way voice picking for hands-free operation.
- **Dynamic slotting & inventory control:** Automated slotting optimizes storage locations based on item velocity. Real-time cycle counting and audit tools maintain inventory accuracy.
- **Integrated transportation:** Embedded TMS capabilities offer multi-carrier rating, manifesting, and mobile delivery management, streamlining outbound shipments.
- **Analytics & reporting:** Pre-built dashboards, heat maps, and multi-dimensional data marts provide visibility into labor productivity, order status, and item movement.
- **Automation & integration:** Open APIs and connectors enable seamless links to ERP systems, material handling equipment, and emerging automation technologies.
