## OVERVIEW

Infios Warehouse Management is an entry-to-enterprise WMS built for intelligent supply chain execution, including people processes, workflows, robotics and automation.

It's designed to give users real-time insights into inventory and warehouse operations to maximize throughput

The modular, best-of-breed system is fully configurable, with the flexibility to add new distribution centers, market verticals and operational complexity as a business grows.

The system can be integrated with a range of major ERP and e-commerce systems. Infios also offers a comprehensive suite of solutions designed to handle the entire supply chain process, both inside and outside of the warehouse.

- **Warehouse Control System (WCS):** Centralized management of material handling equipment, integrating with various automation technologies to optimize material flow.
- **Warehouse simulation:** The warehouse modeling and simulation tools enable businesses to create digital replicas of their facilities, allowing for the testing of different layouts and processes to improve productivity and reduce costs.
- **Freight claim management:** Infios includes capabilities for managing freight claims, streamlining the process of auditing and resolving transportation-related issues to minimize financial losses.
- **Inventory slotting:** The slotting solution uses data-driven analysis to optimize the placement of inventory within the warehouse, improving picking efficiency and reducing handling costs.
- **Technology and integration:** The software uses predictive analytics and AI-driven insights to provide real-time visibility and decision support across the supply chain.

## IS INFIOS SUITABLE FOR SMBS?

Yes. Infios WM doesn't only cater to midmarket warehouses. It's popular among growing businesses in need of a flexible flag-and-switch approach. It's often shortlisted by teams with limited IT capacity to meet their unique operational needs.

3PLs are supported too. Infios supports manual and lightly automated multi-client warehouses. The aforementioned flag-and-switch approach allows for rapid onboarding and setup.

## DEPLOYMENT AND SUPPORT OPTIONS

Infios offers flexible deployment options, including cloud-based and on-premises solutions, to meet the diverse needs of businesses. The company provides comprehensive support services, including training, consulting, and technical assistance, to ensure successful implementation and ongoing optimization.

### ABOUT THE VENDOR

Infios is a global supply chain management software vendor, created from the rebranding of Körber Supply Chain Software (formerly HighJump) and the acquisition of MercuryGate. With over 5,000 customers in 70 countries, Infios offers modular solutions for logistics challenges such as warehouse control, simulation, freight claims, and inventory management.
